Piotr Wojtkowiak

I am a web developer specialized in JavaScript and rich client-side applications. Focused on finding the best solution for a given problem. I'm passionate about new technologies and always eager to help others.

Away from the screen, I like to spin some records, learn something new or try this new craft beer.

Professional capabilities

- Writing modular, performant and reusable code using design patterns
- Building and maintaining high-load applications
- Experience in delivering solutions for variety of platforms in a progressive enhancement way
- Architecture and planning
- Strong knowledge of the front-end

Professional experience

Front-end developer at Marfeel Solutions s.l.
present - 03-2016 / Barcelona, Spain

Maintaining and crafting new features in the Marfeel core product. Working both in front-end and back-end environment. Responsible for exploring new technologies with special focus on JavaScript and mobile performance.

Technical team leader at Insys sp. z o.o
03-2016 - 06-2015 / Poznań, Poland

Close cooperations on projects with design and back-end teams, responsibility for product development, ensuring it's delivered at the highest standard. Exploring and choosing right client-side technologies.

Front-end developer at Insys sp. z o.o
03-2016 - 02-2013 / Poznań, Poland

Building and maintaining software for the web and TV devices. Converting given design project into living applications. Working with modern video technologies, taking care of user experience.

Web developer at Efiltry.pl
02-2013 - 11-2011 / Gostyń, Poland

Working on the user interface, data scraping and implementing the new version of online shop based on Magento e-commerce platform.

Open source projects

Awesome Conferences

My own "pet project". The idea behind Awesome Conferences is to create an open database of conferences and talks resources like videos or slides.

Koduj dla Polski

A platform that helps citizens to propose needs and changes in their neighborhood.

Freelance projects

Maja Sobura - Industrial Designer

I was responsible for the implementation part. The requirement was to create simple portfolio custom Wordpress theme.

Koloremo

My role was to convert given design project into a Wordpress custom theme. To meet requirements I had to implement custom plugins both in back-end and client side.
